

Job advertisement Development engineers (m/f) in Munich-Germany site

The Company

Micron Technology is a world leader in innovative memory solutions that transform how the world uses information. We offer the industry's broadest portfolio and are the only company that manufactures today's major memory and storage technologies: DRAM, NAND, NOR, and 3D XPoint™ memory.

In our Munich Development Center for high-speed signaling we are developing, testing and characterizing industry-leading DRAM memories, which are used in high-performance computing, artificial intelligence, graphic cards, game consoles, automotive, autonomous driving.

Position

To support our growing DRAM business in Munich we are looking for a DRAM circuit design and product/test engineers
The positions are in the following fields:

- System validation engineer
- Product engineer
- Design validation engineer
- Analog design engineer
- Digital fullcustom design engineer
- High speed test engineer

For details about the positions, please visit www.micron.com/careers and select Germany as location

Qualification

The candidate should hold a university master's degree in electrical engineering, physics or computer science, with excellent grades.

A solid background is required in:

- semiconductor physics
- microelectronics
- digital and analog electronics

Desired skills are (depending also on individual positions):

- electronic measurements techniques
- Experience in circuit design
- modern software methods (OOP programming)
- Analytical thinking and structured problem-solving skills
- Proactive and independent way of working
- Knowledge in high frequency signal integrity
- Fluent English skills

Being a team player is mandatory for us, with an attitude to work independently and to be proactive, with analytical thinking. We enjoy working in a multicultural, international and diverse environment. Job experience fitting to the job description is appreciated; first-time employees, however, are highly welcome and explicitly encouraged to submit a job application.

We offer

- An interesting position in the field of Development -Design or Test-in an international, highly innovative and motivated team
- Permanent working contract, 40h/week
- Flexible working hours
- Attractive remuneration

Work location is Munich, Germany
